

## Ear'resistible - Charact'ears

### #41 "Gnarley Snake"

He winds up one ear and his tail will curl around your pierced earring. On the other ear he will wind down as if to bite your other earring.

### #48. South-West Band.

Tiny details carved into this Ear Cuff include a Kokopelli, coyote howling at the moon and many cacti. Works well with Indian or Western earrings, especially in Sterling Silver. (Fits a little differently on either ear.)

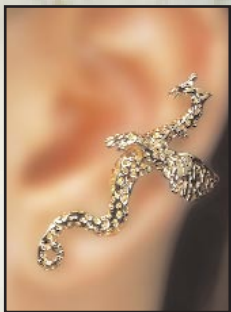

### #49. Large Kokopelli.

Popular through out the Southwest, this "Casanova of the Desert" covers the whole ear. With this conversation piece...you'll be ready to party too.

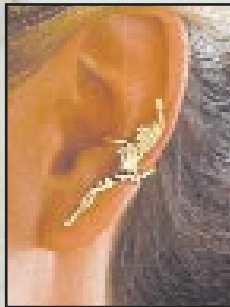

### #67. Spider with Cubic Zirconia.

Crawls up either ear. Spiders have been thought for centuries to bring good fortune. This one has a 4 mm Cubic Zirconia on it's back. Especially popular with "web" Crawlers" on the internet.

### #72. Winged Dragon.

His wings wrap around the ear and the tail reaches down to the lobe, so that your pierced stud earrings can be put through the tail (like an earring jacket).

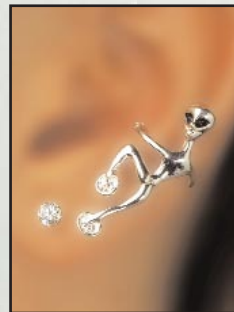

### #84. "Lady Godiva" naked lady.

She rides the "Left" ear in style. Naked. Carved and lost wax cast.

### #86. "Gunther" naked man

He's very nicely built, and everybody likes him. But only ONE per girl!

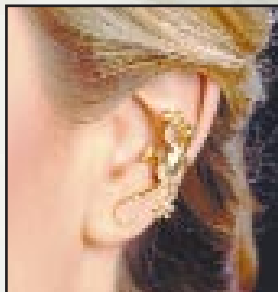

### #85. Aliens

They are out of this world, and a lot of fun. Carved and lost wax cast.

### #92. Small. Art Gecko

This fun character runs up on one ear or turn him over and he runs down the other.

### #93. Art Gecko

This original larger Gecko runs up on the left ear or turn him over and he runs down the right. One side (L) only.
